

Blueprint Reading

Each company has unique drafting standards that cover their drawings. There are however, certain basic drafting standards that will be the same from company to company. These standards make up the words and phrases of the language of blueprint reading. This unit provides instruction in this language.

Workshop Objectives:

- Identify types of lines used on drawings.
- Identify the meanings of lines.
- Give basic geometric definitions.
- Identify drafting methods and procedures.
- Sketch different types of lines used on drawings.
